491 Mycology 02 (Dermatophytes, Yeasts, Mould Fungus)

Sample	Method	Criteria	Your specification(s)	Correct specification(s)	TV-Type	Points scored
21	Microscopy and Subculture					25 of 25
		Macroscopic characteristics	velvety surface		RLV	
		Macroscopic characteristics	yellowish pigmented bottom		RLV	
		Microscopic characteristics	macroconidia		RLV	
		Microscopic characteristics	microconidia		RLV	
		Species	Trichophyton erinacei	Trichophyton erinacei, Trichophyton spp.	RLV	
22	Microscopy and Subculture					25 of 25
		Macroscopic characteristics	brownish pigmented bottom		RLV	
		Macroscopic characteristics	fluffy surface		RLV	
		Microscopic characteristics	macroconidia		RLV	
		Microscopic characteristics	septate hyphae		RLV	
		Species	Aphanoascus keratinophilus	Aphanoascus keratinophilus, Aphanoascus spp.	RLV	
23	Microscopy and Subculture					25 of 25
		Macroscopic characteristics	brownish pigmented bottom		RLV	
		Macroscopic characteristics	velvety surface		RLV	
		Microscopic characteristics	chlamydospores		RLV	
		Microscopic characteristics	macroconidia		RLV	
		Species	Epidermophyton floccosum	Epidermophyton floccosum	RLV	
24	Microscopy and Subculture					25 of 25
		Macroscopic characteristics	brownish pigmented bottom		RLV	
		Macroscopic characteristics	velvety surface		RLV	
		Microscopic characteristics	chlamydospores		RLV	
		Species	Microsporum audouinii	Microsporum audouinii, Microsporum spp.	RLV	

Task part		Reached points	Maximum points	Meets criteria
Identification	(in order to pass the task "Identification" at least 75.0% of the maximum possible points must be achieved)	100	100	+

Additional information on the evaluation is available for download in the RV-Online system in the column "Report".
